

QUALITY, SAFETY AND ENVIRONMENT POLICY

AFAMEC Considers the quality of services provided and the satisfaction of its clients' requirements as an integral part of its responsibility for its activities.

To ensure this commitment, the management of **AFAMEC** has chosen to develop a quality, safety and environmental management system that meets the requirements of the standards **ISO 9001 v 2015, ISO 45001 v 2018 et ISO 14001 v 2015** and encourages all staff to adhere to this approach through the management mode and use of appropriate means.

The strategic orientation of our policy within our field of application is based on the following axes:

- 1- Increase customer satisfaction
- 2- Retain staff and improve their skills
- 3- Maintain an effective Quality, Safety and Environmental Management System.
- 4- Diversify the number of customers and by business sector for a balanced distribution of turnover
- 5- Ensure that the design and development of machines is in line with technological developments
- 6- Comply with safety and environmental regulations.
- 7- Proactively and thoroughly analyse occupational risks and implement the necessary preventive actions.

8- Manage environmental aspects, prevent pollution caused by the activity of **AFAMEC** and ensure respect for the environment through waste management and control of energy consumption.

To this end, the **AFAMEC** Management undertakes to comply with the applicable requirements , to take all necessary measures and precautions for the protection of the environment, prevention of pollution and control of risk, to eliminate hazards and reduce risks for S&ST, the consultation and participation of workers and for the continuous improvement of the quality, safety and environmental management system.
